

Example Course

This course illustrates the export of LiaScript based learning content. Visit the youtube channel of LiaScript to get an overview about already implemented features.

Interactive Tables

Click to [Bar chart](#) for visualizing diagram's content.

Animal	weight in kg	Lifespan years	Mitogen
Mouse	0.028	02	95
Flying squirrel	0.085	15	50
Brown bat	0.020	30	10
Sheep	90	12	95
Human	68	70	10

More information about interactive tables are available [here](#)

Quizzes

What is the derivative function of $f(x) = x^6$?

selection

▼

What is $37 + 15$?

More information about quizzes are available [here](#)

Executable and editable Codes

js based interpreters

PlotSin.py

```
1 import numpy as np
2 import matplotlib.pyplot as plt
3
4 t = np.arange(0.0, 2.0, 0.01)
5 s = np.sin(2 * np.pi * t)
6
7 fig, ax = plt.subplots()
8 ax.plot(t, s)
9
10 ax.grid(True, linestyle='-.')
11 ax.tick_params(labelcolor='r', labelsizes='medium', width=3)
12
13 plt.show()
14
15 plot(fig) # <- this is required to plot the fig also on the LiaScript
    canvas
```

More information about the Pyodide plugin are available [here](#)

Server based compiling and execution

Program.cs

```
1 using System;
2 using System.Collections.Generic;
3 using System.Collections;
4 using System.Linq;
5 using System.Text;
6
7 int n;
8 Console.WriteLine("Number of primes: ");
9 n = int.Parse(Console.ReadLine());
10
11 ArrayList primes = new ArrayList();
12 primes.Add(2);
13
14 for(int i = 3; primes.Count < n; i++) {
15     bool isPrime = true;
16     foreach(int num in primes) isPrime &= i % num != 0;
17     if(isPrime) primes.Add(i);
18 }
19
20 Console.WriteLine("Primes: ");
21 foreach(int prime in primes) Console.WriteLine($" {prime}");
```

project.csproj

```
1 <Project Sdk="Microsoft.NET.Sdk">
2   <PropertyGroup>
3     <OutputType>Exe</OutputType>
4     <TargetFramework>net5.0</TargetFramework>
5   </PropertyGroup>
6 </Project>
```

CodeRunner is not defined

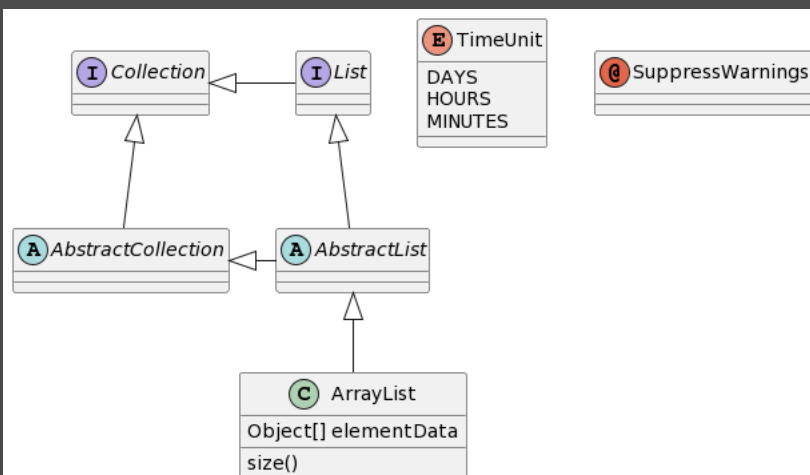

More information about the Coderunner plugin are available [here](#)

Diagrams and Schemas

Software development

PlantUML.txt

Visualization

Note: This might take a while, to load and render the vti data set within the browser.

Examine the 3D object by mouse movements and clicks.

More information about the VTK plugin are available [here](#)
